

Artistic Approach:

"I love calling my work photographism, as my visual creations weave together, are a shared compendium of graphics arts, photographs and scenography with mutual dependence. I am watchful of the magnificent textures that nature offers us and I enjoy producing images that plunge us into adventure in harmony with the planet.

My objective was to capture in a 21st-century medium the fierce and luminous beauty of the world ".

Nature is light... Nature is a trap... but I chose to have a vision dedicated to sustainability and to make society more sensitive to environmental issues.
