ME

Originally from Castiglione Olona, a charming village near Varese, I graduated in fashion design from IED in Milan in December 2023. During my academic journey, I had the opportunity to fully immerse myself in my passions, ranging from art to design. Additionally, I acquired technical skills that now enable me to bring my ideas and creativity to life.

The initial stage of designing a collection is my favorite: I can spend endless hours conducting iconographic and textile research. I enjoy creating prints and jacquards, textile manipulations, and embroidery. I describe my work as very tactile, placing significant emphasis on the use of color.
