PROJECTS

FASHION DESIGN

- Awarded from FSF Scholarship 2024. Under the "ESG: The Intersection of Brands, Environment, and Society" theme, I created a "Couleur de l'âme" collection to serve people and the planet while ignite ESG to Jacquemus.
- Submitted to 2023 CFDA Design. It innovated Zero-Waste Fashion by utilizing leather waste and recycled cloth combined with 3D technology to create modern silhouettes outfit. It excelled the fashion sustainable and Thai culture heritage was my inspiration.
- Awarded from PVH Forward Fashion x FSF Scholarship 2023. Under the "The future is now" theme, I presented a series of apparel that reflects the virtual wearer. ISSEY MIYAKE and the AI-powered "MIDJOURNEY" collaborated to build a virtual unique outfit based on "A Piece of Cloth" concept, so they can make their own apparel at their fingertips.
- A school runway project in which I learned technical flats, fashion illustration, fabric sourcing, and garment manufacturing. Valentino Black Tie Fall/Winter 2023-24 inspired me. This project necessitates meticulous attention to detail.
